

Tax Consultant at the Tax Director Level – Client of KulaConsulting – Bay Area, CA

The position is targeted at 6-8 months, with the potential for perm conversion. The client is looking for someone to lead Tax Operations (Provision, Compliance, etc, etc) on a “day-to-day” basis, with the VP of Tax ultimately looking for her “right hand”. The client is looking for someone with strong Tax Provision skills. This role will include training and oversight of a team in India, which will require calls in the earlier morning (6:30 am PST). The team in India has worked on US Tax for 10+ years, so the team should get “trained up” fast.

The “right person” needs to be able to roll up their sleeves and dive into schedules ... there will be hiccups, she needs someone that will problem solve, not simply throwing their hands in the air, dropping it on someone else ... The current Tax Director will be a wealth of knowledge, but the “right” person needs to see the Tax Director as a colleague, not someone that will take what cannot be handled when things get “tough” ... the Tax Director is not a direct report ...
